

On May 23<sup>rd</sup> and May 24<sup>th</sup>, Framingham Heart Study (FHS) had the privilege of hosting Dr. Mulubrhan Mogos, recipient of the FHS Visiting Scientist Award. Dr Mogos, a well published author of several research articles, states that his “career research goal is to investigate the health effects of behavioral, biological and environmental risk factors on maternal cardiovascular health, and explore potential interventions that reduce cardiovascular disease risk among women. The long-term goal of my [his] research program is to reduce adverse fetal-maternal outcomes and eliminate health disparity in pregnancies complicated by cardiovascular disease including hypertensive disorders of pregnancy.”

During his visit, Dr. Mogos toured FHS’ Research Center, Health Information Management and Data Management departments and was given the opportunity to sit in on our EndPoint Review meetings. Dr. Mogos met with both FHS and NHLBI Principal Investigators as well as Early-Stage Investigators. during his visits to both FHS facilities in Framingham, and the Boston University Medical Campus.
